TEAM PARIS

P5 TWITTER SENTIMENT ANALYSIS.

In project 5, we have embarked on sentimental analysis to classify the sentiments of tweets on Covid vaccine. We have leveraged on a pre-existing ML model found in Hugging face, on our article we explain a step-to-step guide on how to fine-tune a pre-existing model, and in our Hugging Face platform is a Gradio app to interact with our model.

Feel free to browse through the links.

	About	Link
Github	Find herein the notebook with all the associated files therein.	https://bit.ly/3QcAp7U
Deployed App	Here you'll interact with our deployed app, using gradio, uploaded in the hugging face platform.	https://bit.ly/44Ldnti
Published Article	Here we outline the steps followed in fine tuning the model we selected and used.	https://bit.ly/3Oqshzi
